1. When assessing measures of personality, it is important to consider which two factors:

1 / 1 point

- ☒ a. reliability and validity
- ☐ b. reliability and flow
- ☐ c. difficulty and expertise
- ☐ d. difficulty and reliability

Correct

2. Which of the following is true of the 5-factor model of personality?

1 / 1 point

- ☐ a. observers generally agree on people's personalities
- ☐ b. it predicts people's behavior
- ☐ c. it remains relatively stable across a lifetime
- ☒ d. all of the above
- ☐ e. (a) and (b) only

Correct

3. IQ tests are typically made up of several sub-tests. According to Spearman's two-factor of intelligence, which of the following is true:

1 / 1 point

- ☒ a. The 'g' factor explains the similarities among sub-tests, while the 's' factor explains the differences
- ☐ b. The 'g' factor explains the differences among sub-tests, while the 's' factor explains the similarities
- ☐ c. both 'g' and 's' explain the similarities among sub-tests
- ☐ d. both 'g' and 's' explain the differences among subtests

 **Correct**

4. **True or false:** If there is high heritability among individuals within a group, that means that group differences are probably also due to genetic factors.

1 / 1 point

- ☐ a. true
- ☒ b. false

 **Correct**

5. The Flynn effect refers to the growth in absolute intelligence over the last few generations. What does the Flynn effect tell us about intelligence:

1 / 1 point

- ☐ a. it shows that genetic factors have a significant influence on intelligence
- ☒ b. it shows that environmental factors have a significant influence on intelligence
- ☐ c. both of the above

 **Correct**

6. **True or false:** For most traits, shared environment contributes more than non-shared environment.

1 / 1 point

- ☐ a. true
- ☒ b. false

 **Correct**

7. Which of the following is **not** a formal type of schizophrenia?

1 / 1 point

- ☒ a. dissociative
- ☐ b. catatonic

- ☐ c. disorganized
- ☐ d. paranoid

 **Correct**

8. Which of the following is a negative symptom of schizophrenia?

1 / 1 point

- ☐ a. hallucinations
- ☐ b. delusions
- ☐ c. disorganized speech
- ☒ d. flat affect
- ☐ e. all of the above

 **Correct**

9. Major Depressive Disorder is defined as persistent, marked depressed mood (coupled with other cognitive and physical symptoms) the must last at least:

1 / 1 point

- ☐ a. two hours
- ☐ b. two days
- ☒ c. two weeks
- ☐ d. two years

 **Correct**

10. **True or false:** The neurotransmitter serotonin has been linked to depression

1 / 1 point

- ☒ a. true
- ☐ b. false

 **Correct**

11. Which of the following is **not** a personality disorder in the DSM:

1 / 1 point

- ☐ a. histrionic personality disorder
- ☐ b. narcissistic personality disorder
- ☒ c. anxious personality disorder
- ☐ d. borderline personality disorder

 **Correct**

12. Free association is used in what type of therapy:

1 / 1 point

- ☐ a. cognitive therapy
- ☐ b. behavioral therapy
- ☐ c. cognitive behavioral therapy
- ☒ d. psychodynamic therapy
